

Pedapudi Akhila

✉ akhilapedapudi19@gmail.com ☎ +91-9392333096 📍 Vijayawada, Andhra Pradesh

EDUCATION

Indian Institute of Engineering Science and Technology, Shibpur <i>Bachelor of Technology in Computer Science and Technology</i> CGPA: 8.83	2023 – 2027 Howrah, West Bengal
Dr. B.R. Ambedkar Gurukulam for Girls, Class XII Percentage - 96.6%	2021 – 2023 Vijayawada, Andhra Pradesh
St. Joseph's English Medium High School, Class X Percentage - 99.5%	2020 – 2021 Vijayawada, Andhra Pradesh

EXPERIENCE

AgentTrack AI 🔗, <i>Research Intern</i>	Shibpur, India
- Built a full-stack workforce management platform using React.js, Node.js, Express.js, and MongoDB, supporting Admin, Manager, and Employee role-based workflows. - Implemented task assignment, real-time collaboration using Socket.IO 🔗, and an activity audit trail tracking 22+ user actions to improve operational transparency. - Integrated Generative AI using Groq/Llama 3.3 for workload analysis and automated reporting, with reliable fallback logic for resilient AI-powered insights. - Deployed the application on Vercel and Render, enabling secure frontend-backend integration and cloud accessibility.	

PROJECTS

Event Management Platform (MERN)

- Built a full-stack event management platform supporting event creation, participant registration, ticket booking, and role-based administration.
- Developed secure RESTful APIs with JWT Authentication, RBAC, server-side validation, and CRUD operations for reliable access control and data management.
- Designed responsive dashboards for administrators and attendees, streamlining event management workflows and participant interactions.

SURGE – AI-Powered Dynamic Pricing Engine

- Engineered an AI-powered pricing system using Google Gemini API and Explainable AI (XAI) to generate contextual pricing insights and operational recommendations.
- Designed a real-time weighted pricing algorithm using demand–supply ratio, traffic, weather, peak hours, and events to compute configurable surge multipliers and fares.
- Built and deployed an AI analytics platform with pricing simulations, historical analytics, JWT/RBAC, using React.js, Node.js, Express.js, MongoDB, Vercel, and Render.

TECHNICAL SKILLS

AI & Cloud: Google Gemini API, Groq (Llama 3.3), Prompt Engineering, Explainable AI, Generative AI, Vercel, Render
Languages: C, C++, Python, JavaScript (ES6+), SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), Socket.IO
Databases: MongoDB, MySQL
Developer Tools: Git, GitHub, Postman, VS Code, Linux, Microsoft Excel, PowerPoint
Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, SDLC, Problem Solving

CODING PROFILES

LeetCode 🔗
Pedapudi Akhila – Solved 280+ algorithmic problems across Data Structures & Algorithms, SQL, and C, strengthening problem-solving and coding proficiency.
CodeChef 🔗
akhila lil – 2★ Rated (Max Rating: 1448)

ACHIEVEMENTS

National Cadet Corps (NCC)
Awarded the NCC 'B' Certificate (Grade A), demonstrating leadership, discipline, teamwork, communication, and organizational skills through active participation in training and institutional activities.
Academic Society of Computer Engineers (ASCE) — Design Team Lead
Led the design team in creating promotional creatives, event posters, and digital content for departmental activities, coordinating design tasks and ensuring timely delivery.
